

AUTOMATIC LEVERAGE ADJUSTMENT POLICY

CPT Markets (Pty) Ltd leverage adjustment policy will be adjusted to the corresponding leverage level in strict accordance with the account equity.

No.	Leverage	Equity	Description
1	1:1000	0 - \$1,000	If the user's equity is between \$0 and \$1,000, the system will automatically adjust the leverage to 1:1000.
2	1:500	\$1,000 - \$20,000	If the user's equity is between \$1,000 and \$20,000, the system will automatically adjust the leverage to 1:500.
3	1:400	\$20,000-\$50,000	If the user's equity is between \$20,000 and \$50,000, the system will automatically adjust the leverage to 1:400.
4	1:300	\$50,000-\$100,000	If the user's equity is between \$50,000 and \$100,000, the system will automatically adjust the leverage to 1:300.
5	1:200	\$100,000- \$200,000	If the user's equity is between \$100,000 and \$200,000, the system will automatically adjust the leverage to 1:200.
6	1:100	\$200,000 - \$1,000,000	If the user's equity is between \$200,000 and \$1,000,000, the system will automatically adjust the leverage to 1:100.
7	1:50	Above \$1,000,000	If the user's equity is Above \$1,000,000, the system will automatically adjust the leverage to 1:50.

Example of adjustment rules

Assuming an initial deposit of \$10,000 for an account, the initial leverage is 1:500. After the profit of the transaction becomes \$20,000, We will adjust the leverage of the account to 1:400. If the net value of the account changes to \$19,999.99 on the next system scan, the leverage will be reverted to 1:500. Since all adjustment leverage operations are performed manually based on the account equity, we recommend that the trader control the trading position to avoid the account being forced to close due to adjustment leverage. We assume no responsibility for the loss of forced liquidation caused by the adjustment of the leverage after the change in net worth.

Market Manipulation Prohibited

Traders are prohibited from engaging in Market Manipulation.

Market Manipulation of any kind is strictly prohibited. Market Manipulation is defined as actions taken by any market participant or a person acting in concert with a participant which are intended to:

Deceive or mislead other Traders.

Artificially control or manipulate the price or trading volume of an Asset; or

Aid, abet, enable, finance, support, or endorse either of the above.

Market Manipulation specifically includes, without limitation: front-running, wash trading, spoofing, layering, churning, and quote stuffing
